OUT WITH THE OLD

SAVE MONEY ON BRAND NEW DEVICES POWERED BY INTEL® CORE™ i3 PROCESSORS

DON'T SETTLE FOR REFURB WHEN YOU CAN GET THE LATEST TECHNOLOGY FOR LESS - WITH CENTERPRISE AND INTEL®

More and more schools are having to sacrifice when it comes to technology. Increasing challenges with budget mean they are having to invest in refurbished devices to help move technology and the learning experience forward.

We think this is a bit of a false economy. Although they might be marginlly cheaper initially, over time refurbished devices could actually end up costing you more in support costs, lack of energy efficiency and maintenance compared to a brand new device.

The Centerprise range, powered by the latest Intel® Core™ Processors, gives schools access to great value and performance at lower prices.

Lower total cost of ownership
Older PCs cost more to maintain. New devices means lower support costs and a longer lifespan.

Powered by Intel® Core™ i3 processors
Get more performance, more productivity and better value for money.

More energy efficient
Newer technology consumes power more efficiently.

Smaller footprint
Newer technology means more space saving options.

Pay for the power you need
A brand new Ci Renatus device can be customised to your specifications - giving you more flexibility and opportunities to save.

Cost saving
Shape the Future pricing means up to £30 off per Windows license per PC.
