

Part of Centerprise International

Managing Technology, Concept-to-Decommission

When you need an OEM partner who can take ownership across the whole programme, Ci-OEM brings the right capabilities together under one accountable team.

Design validation, certified manufacturing, fulfilment and lifecycle services sit in one place, helping you reduce risk, shorten lead times and scale with confidence.

The Five Pillars of Ci-OEM

05

Lifecycle

Effective IT lifecycle management transforms your technology from a cost centre into a strategic asset. It harmonises every stage from procurement and deployment through support and secure retirement, all integrated within a single, accountable programme.

04

Logistics & Supply Chain Management

The final stage of your supply chain, the moment an order becomes a delivery, is a critical touchpoint that defines your customer's experience. In a competitive market, order fulfilment goes beyond logistics. Done right, it reinforces your brand's promise of quality and reliability.

01

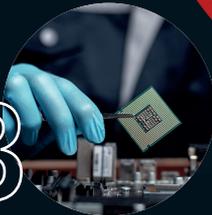

Prototyping

Rooted in decades of hands-on hardware engineering, Ci-OEM, part of Centerprise International, delivers a full suite of Prototyping, Certification and Testing services to power your next-generation product.

03

Workshop Repair

Rely on Ci-OEM's specialist Workshop Repair Services to restore and maintain your critical equipment with speed and precision.

02

Manufacturing

Ci-OEM specialises in turning your ideas into market-ready products with expert design, manufacturing and assembly services.
