

Why Buy a Refurbished Laptop?

It's cost-effective, eco-friendly, and reliable. You save money while reducing electronic waste by giving tech a second life.

Resources Intensive Production

Making a new laptop uses 190,000 litres of water, worsening water scarcity

High Carbon Emissions

Production of a new laptop emits 320kg of CO₂, the equivalent of driving 800+ miles

E-Waste Growth

50m tons of e-waste are generated annually, with only 20% properly recycled, causing pollution

The Benefits of Buying Refurbished PCs

Cost Effective:

Refurbished laptops cost up to 50% less than new, offering great performance at a lower price

Lower Carbon Footprint:

Refurbishing extends a laptop's life, cutting down carbon emissions from manufacturing.

Support circular Economy:

Buying refurbished encourages reuse and recycling, reducing raw material extraction
