YOUR COMPLETE SOLUTION FOR ESPORTS

At Yoyotech, we specialise in designing and building esports arenas, specifically for educational purposes. We offer a comprehensive range of services to create state-of-the-art immersive environments that can be used for a variety of educational requirements. Here are some examples of what we provide in our complete design and build services for educational spaces:

- **Custom Design:** Yoyotech will work with you to create custom designs that meet your specific needs. This includes 3D design, planning and furniture to ensure that the space is functional for its purpose.

- **High-Quality Equipment:** We supply high-end gaming PCs, peripherals, and accessories that are essential for a top-tier esports and learning experience. This equipment is designed to ensure durability and performance, suitable for intensive use.

- **Infrastructure:** Yoyotech handles the installation of the necessary infrastructure, such as networking, power and data, lighting, and HVAC, to ensure that your arena operates smoothly and efficiently.

- **Furniture and Ergonomics:** At Yoyotech, we provide bespoke ergonomic furniture designed to enhance comfort and performance, including desks, gaming chairs, and other furnishings designed specifically for students and teachers.

- **Software and Support:** Yoyotech offers total software solutions for managing your space, including game management platforms, monitoring tools, maintenance support and safeguarding. We also provide ongoing technical support to ensure your arena remains operational and up-to-date.

IN EDUCATION

- **Training and Development:** We offer training for students and teachers to maximise the potential of your arena, the curriculum and the educational benefits of esports. Yoyotech helps educational institutions create dynamic and engaging spaces that serve as hubs for learning, competition, and community building.

Since its launch in 2020, the BTEC qualification in esports has revolutionised education in the UK. Embraced as an exciting addition to the curriculum, it has gained traction across schools, sixth forms, colleges, and universities, reflecting the growing popularity of the esports industry.

In a sector that's increasing exponentially, education has taken the front foot to focus on developing the next generation of professionals who will acquire the skills and knowledge for employment within the esports industry.

The Yoyotech team is made up of both industry and educational experts who bring extensive experience in teaching the esports BTEC. They are also heavily involved in the development and quality assurance of the qualification in collaboration with Pearson. With esports poised to surpass traditional sports in both participation and fanbase, now is the perfect time to prepare your students for this rapidly growing and inclusive industry by transforming your learning environment.

CUSTOM ESPORTS FURNITURE FOR THE CLASSROOM

ES2 DESK

A STAGE FOR PERFORMANCE

The Yoyotech ES2 desk is the definitive esports desk, designed specifically for high-performance educational environments.

Built to stand against walls or in back-to-back island configurations, it maximises player immersion while providing the robust security schools demand. Developed with input from ex-industry professionals, this is where student safety meets professionalgrade ergonomics.

Secure by Design

Features custom steel security brackets with specialist screws, ensuring your high-end hardware can never be knocked off, tampered with, or stolen.

Inclusive & Modular

Available in infinite modular rows with specialized DDA-compliant motorised sit/stand options to ensure every student has a seat at the table.

SECURITY BRACKET

Fabricated steel bracket. Protects your investment by locking the PC chassis firmly to the unit.

MONITOR MOUNT

Integrated mounting brackets lift screens off the desktop, maximising play space and improving posture.

MATERIALS

High-density MDF and laminate construction. Sustainable, recyclable, and built to survive the school day.

SALES@YOYOTECH.CO.UK

LOW-PROFILE STANCE

Engineered for open spaces. Keeps the classroom connected with clear sightlines from front to back.

ESX DESK
BUILT FOR VISIBILITY

The Yoyotech ESX solves the biggest challenge in the classroom: visibility. Engineered based on direct feedback from teachers , the low-level profile ensures clear sightlines across the entire room. It keeps the technology prominent without creating a barrier between the educator and the student, making it the perfect choice for open-plan learning spaces.

Teacher-First Visibility

The low-profile design eliminates 'hiding spots', allowing teachers to maintain full command of the room while keeping students engaged.

The 'Star of the Show'

We don't hide the hardware. The PC is displayed prominently on the desk , celebrating the tech without sacrificing usable mouse-and-keyboard space.

CABLE MANAGEMENT

Keep the 'star of the show' clean. Smart routing keeps cables tidy and out of sight.

PC PODIUM

Displays the PC prominently rather than hiding it, turning your hardware into a visual feature.

THE RISE OF RACING SIMULATION IN ESPORTS EDUCATION

Racing simulators are transforming esports education in the UK, combining competitive gaming with hands-on learning. These systems replicate real-world driving scenarios, providing a platform to teach STEM principles like physics, mechanics, and data analysis while fostering critical thinking, teamwork, and communication.

KEY EDUCATIONAL BENEFITS:

STEM Learning:

- Simulators teach car dynamics, aerodynamics, and real-time data analysis, offering practical STEM applications.

Skill Development:

- Students build reflexes, strategic thinking, and adaptability while enhancing teamwork and leadership through collaborative gameplay.

Career Preparation:

- Racing simulations open pathways to careers in motorsport engineering, game design, broadcasting and professional esports.

CONCLUSION:

With advanced equipment like Fanatec cockpits and Moza Racing peripherals, simulation racing delivers immersive, impactful learning experiences. By driving STEM education, skill growth, and career readiness, racing simulators are redefining the role of esports in UK education and paving the way for future opportunities in the industry.

ESPORTS MANAGEMENT SOFTWARE

Yoyotech is the UK's leading systems integrator of ggCircuit, the world's premier esports arena management software for education.

The Esports Management Platform

The ggLeap esports management platform provides an intuitive, secure user experience on your computer suite while allowing for easy, web-based administration. No more manually logging students into games and having to securely manage credentials; with ggLeap, it's click and play!

1 Customisable secure desktop overlay

2 A platform for students to launch all their favourite titles

3 Compete for leaderboards locally and globally

4 Allows for easy monetisation of your spaces

5 Ensure maximum uptime with daily remote updates

6 Gives the teacher control over PCs – Logging in/remote access/powering on

7 Game license management system

8 Manage safeguarding

Game Update and Security Solution

With a ggRock dedicated LAN server, all PCs can boot a disk image from specialised hardware. The ggCircuit team will ensure that all your games and software are up-to-date at all times – no staff intervention is required!
